

Title: Sanding and Salting

Policy No: 3221

Approval: County Council
Effective Date: January 1, 1994

Supersedes Policy No:

Policy Statement: To outline the procedure used for winter sanding of municipal roads.

1. Winter sanding and salting is to be carried out on all paved surfaces as deemed necessary. The aprons leading onto paved roads are also to be sanded and salted as required.
2. Gravel roads will not normally be sanded; icy hills, intersections, and railway crossings will be chipped or gravelled when required. In special circumstances, other locations will be done where required.
3. County staff will be on call on a weekly rotation from November to April. They will conduct a road tour to determine the condition of secondary roads and will call out sanding trucks by 6:00 a.m. if deemed necessary.
4. The on-call person will be supplied with a cellular phone.
5. The Municipality is divided into two areas for sanding with at least two County trucks available.
