1. My name is Scott Webb. I am the Woodlands County (the “**County**”) Manager of Protective Services. In that role, I am responsible for overseeing the four volunteer fire departments within Woodlands County, as well as the County’s patrol officers’ program and health and safety department.
2. The Manager of Protective Services position is new for the County and I am the first person in it. I began working in it in March 2021. My responsibilities as Manager of Protective Services include overseeing Woodlands County’s fire departments, patrol officers' program, and health and safety matters.
3. My background is and job responsibilities are summarized in the *curriculum vitae* appended to this statement at **TAB 1**.
4. I served as the Deputy Fire Chief of High Level from September 2001 – July 2008, and then as the Deputy Fire Chief/Training Officer for Grande Cache fire department from July 2008 – June 2014. I also have experience in the armed forces and the oil and gas industry.
5. I am a NFPA 1001 certified fire fighter, fire officer, and certified safety codes officer. However, the County is not accredited to conduct fire investigations so, while I am trained to conduct fire investigations, I cannot do so in my current role.

#### **The County’s Volunteer Fire Departments**

6. The County’s fire emergency response is divided between four volunteer fire departments. The fire departments operate out of Blue Ridge, Anselmo, Fort Assiniboine, and Goose Lake. Unlike the Town, the County’s fire department chiefs and deputy chiefs are volunteers as well.
7. The volunteer firefighters work at other (typically paid) jobs. County fire department volunteers live and work around the County, including in the Town of Whitecourt.
8. The ability of the County’s fire departments to respond to emergencies depends on the availability of its volunteers, who often have to travel to a fire station before they can subsequently be deployed. For example, a volunteer with the Blue Ridge fire department who lives and works in Whitecourt may have to travel a significant distance to access equipment before they can deploy to fight a fire.

9. While I am relatively new to my role as Manager of Protective Services, I have had the opportunity to work with the firefighters in Woodlands County. They are dedicated and professional, and I am not aware of any times where Woodlands County firefighters were incapable of using their PPE correctly or failed to adequately respond to an emergency, as appears to be alleged by the Town's Fire Chief in a statement he made which is included in the Town's witness statements received June 30, 2020.

### **Training**

10. The County's volunteer firefighters have an opportunity to train to the NFPA 1001 standard and either have completed, or are in the process of completing, the necessary training courses. Because they are volunteers, the required training takes longer to complete than if they were working on it full time (which typically takes 12-18 weeks). They operate under the direction of fire officers who are trained to the NFPA 1021 Officer standard.
11. The County's firefighters receive training for responding to a range of emergencies, including:
  - Structural fires;
  - Vehicle accidents and fires;
  - Wildland fires (per the NFPA 1051 standard), including participating in controlled burn activities in conjunction with Alberta Forestry;
  - Farm machine rescue and extrication;
  - Swift water and ice rescue (in Fort Assiniboine); and
  - Search and rescue services (which are provided to assist the RCMP).
12. The County's firefighters also complete a range of other training, including:
  - Commercial vehicle training, including cargo securement, air brake, weights and dimensions training;
  - Emergency vehicle driver training;
  - H2S Alive;
  - Standard first aid;
  - Medical First Responder training;

- WHMIS; and
  - Hazardous materials.
13. The County's fire departments are not trained to the NFPA 1081 Industrial firefighting standard. However, firefighting and emergency response services for industrial premises in the County (such as oil and gas facilities and lumber and forestry mills) are frequently provided by the business under contract with a private firefighting service.
14. There is a NFPA 1041 trained fire instructor in the Fort Assiniboine fire department, and another is being trained in Blue Ridge.
15. Additional training is provided in conjunction with fire departments in Lac Ste. Anne and Barrhead, for which the County pays, as well as by outside trainers who may be needed for specialized or specifically accredited training. The County's fire departments also participate in weekly training exercises or classes.

### **Equipment**

16. A spreadsheet showing the County's inventory of firefighting vehicles and equipment, which are allocated between the four fire departments, is appended at **TAB 2**.
17. The County's firefighters are provided with all necessary PPE for safe operation, including fit-tested self-contained breathing apparatuses, personnel alert safety systems, boots, and bunker gear.
18. The County's mini pumpers were intended to be used to respond to structure fires, as well as for rapid response to grass fires and other emergencies where the quick deployment of a smaller team of firefighters (with support following in other vehicles) is important.
19. While the Woodlands County airport may be capable of receiving a Boeing 747 airplane, it primarily serves commercial and hobby aircraft. The main fire risk posed by the airport is fuel fires. These do not require specialized equipment to fight beyond firefighting foam, which can be deployed using foam nozzles or inline inductors in standard hoses. These can be used with standard fire pumps.
20. Many areas in the County also have insufficient water pressure available to effectively use larger-scale equipment like aerial pumps effectively.

## Service Levels

21. The County has set fire and emergency service levels pursuant to policy found at section 12.2 of the County Standard Operating Guidelines. A copy of the County's fire/emergency service level policy is appended at **TAB 3**.
22. The applicable service levels set by the County vary throughout the geographic area for which the County provides fire/emergency services. The fire services provided in Fort Assiniboine are functionally equivalent to those provided by the Town. In Fort Assiniboine, emergency responders are trained to provide emergency medical treatment and rescue and there is an emergency response vehicle available at the Fort Assiniboine fire hall for that purpose.
23. Firefighters in other County departments are not permitted to perform vehicle extrication or provide medical services.
24. The service levels set by Council set the parameters of the kinds of emergency services that the County's fire departments can provide. This is the case irrespective of whether the firefighters are trained to provide those services.
25. The service levels dictate not only the training that is provided but also the equipment and materials that are provided for emergency service delivery. For example, high angle rescue services require specialized ropes and equipment that are not available to County firefighters. The County could be exposed to significant liability if its firefighters provide services outside of the specified levels.
26. Accordingly, the way in which County emergency responders respond to calls depends on the nature of the call and the services required. Dispatch for the County's fire/emergency services is centralized and notifications are routed to the most appropriate responding department. The individual County fire departments operate relatively autonomously.
27. Where more manpower or technical expertise is required to respond to a fire than the County can provide, the County is party to mutual aid agreements with nearby municipalities (including Lac Ste. Anne, Yellowhead County and Barrhead) that permit

additional resources to be called upon to respond at no cost to the County beyond the reciprocal provision of aid to the other municipality.

28. The County is not currently party to the Northwestern Alberta Emergency Resource Agreement, but County administration supports entering it.

#### **Emergency Response Statistics 2014-2018**

29. A spreadsheet summarizing the total numbers of Town and County fire emergency responses for the period of 2014-2018 is appended at **TAB 4**. This information was previously obtained from the Town of Whitecourt.

#### **Improved Communication and Service Coordination**

30. The Chiefs and Deputy Chiefs of the County's fire departments meet on a regular basis (currently monthly) as the County Fire Committee. Since I started in my role as Manager of Protective Services, I participate in Fire Committee meetings as well.
31. In Fire Committee meetings, we discuss and arrange for training for the County's firefighters, coordination of services, and other issues relating to the provision of fire services. This new coordination process allows the County to deploy its fire services resources more effectively and lowers the amount of reliance that the County places on the Town and other nearby municipalities to respond to emergencies.
32. At this time, the County only asks the Town to respond outside of its service area where technical or manpower assistance is necessary and cannot be provided in a timely fashion by the County's fire departments.

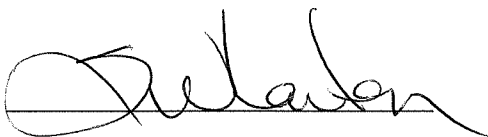

#### **2021 Budget and Expenses Year to Date**

33. The current budget and year-to-date expenditures by the County for the provision of fire services are shown in in a spreadsheet attached as **TAB 5**.

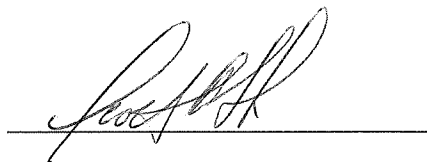

34. I solemnly declare the information set out above to be true and accurate, to the best of my knowledge, and intended to be used in the ICF Arbitration proceedings noted at the top of page 1 of this statement. By signing this statement, I and acknowledge and understand it to have the same force and effect as if made under oath.

## SECTION 12.2

### EMERGENCY/FIRE RESPONSES LEVEL OF SERVICE

#### Policy

Woodlands County will provide fire protection services according to the provisions of this policy statement.

Woodlands County Council recognizes the boundaries of the County encompass a vast geographical area within which residents and visitors can be exposed to a variety of dangers from fire and other emergencies.

The County Fire Protection and Emergency Services (CFPES) were created to assist, whenever possible, persons within the County in protecting their health and property when those emergencies described listed within arise. County Council and the CFPES recognize however, that emergency response cannot be guaranteed for each and every emergency incident that arises due to the limited resources Council can expend on emergency services and the difficulty in ensuring that volunteer staff will be available in sufficient number and with sufficient training on a 24 hour basis to respond to every call for assistance received in a timely and safe fashion.

Council also recognizes that when a response is provided the service level of that response may be different in various areas of the County. A response may differ for a variety of reasons including:

- the vast geographical size of the County;
- the difficulty in accessing the remote areas within the County;
- the location, staffing and training levels of the emergency response stations and departments within the County,
- the differing availability of water for fire suppression purposes within areas of the County;
- adverse weather conditions;
- reliance on contract emergency services;
- the limited resources the County can expend on training emergency personnel and on the purchase of equipment when compared to the different types of emergencies for which training and equipment are available;

Council therefore establishes those levels of service contained in this policy document and such further levels of service as Council may formally approve by resolution.

**Scope:**

This policy applies to all CFPES Fire Department members and to fire and emergency service provision within the County.

**Definitions:**

1. Awareness level: Responders will recognize risks and hazards, secure the area and call for trained assistance.
2. Fire Department means the Blue Ridge, Fort Assiniboine, Anselmo and Goose Lake fire services.
3. Fire Committee means a advisory group , consisting of the Director of Planning and Community Services, all Fire Department Chiefs and Deputy Chiefs.
4. Operations level: Responders will take defensive action to contain and control the incident and seek assistance from outside agencies equipped to mitigate the incident
5. Technician level: Responders will initiate offensive action to bring the incident under control and to an end.

**Training:**

1. Fire Fighter training shall be based primarily on those services delivered by CFPES as described herein.
2. All CFPES Firefighters will be equipped and trained for structural and wild land fire suppression according to those minimum standards required by this policy and as recognized in the Province of Alberta.
3. The Fire Chiefs in each Fire District within the County are responsible for ensuring all members initially achieve and maintain the training levels required by their respective Fire Departments.
4. Each Fire Chief shall maintain their respective training records.
5. The Fire Committee will ensure that joint training occurs between all Fire Departments on an annual basis.
6. Those CFPES firefighters who provide any or all of the specific service delivery tasks noted below shall be trained and equipped to those minimum standards as recognized in the Province of Alberta.
7. CFPES Firefighters are expected to participate in ongoing training to achieve these minimum levels and to maintain their skills in these areas.

8. Firefighters shall not be expected to perform duties beyond their scope of training.

**Emergency Responses:**

1. The major apparatus of the CFPES shall be deployed as follows:
  - Level One Stations include Fort Assiniboine, Blue Ridge and the contracted services of the Town of Whitecourt and are each equipped with a Class "A" Pumper and a Tanker. Fort Assiniboine and Whitecourt also deploy a Rescue unit as required.
  - Level Two stations include Anselmo and is equipped with a pumper unit, and a tanker.
  - Level Three station includes Goose Lake and is equipped with a combination pumper/tanker unit.
2. Where a Level Two station is the first response sent to any fire then:
  - In the case of Anselmo, Blue Ridge shall be simultaneously dispatched with a Class "A" Pumper.
  - Mutual Aid partners are called at the discretion of the Chief.
3. Where a Level Three station is the first response sent to any fire then:
  - In the case of Goose Lake either Blue Ridge or Fort Assiniboine will be simultaneously dispatched with a Class "A" Pumper.
  - Mutual Aid partners are called at the discretion of the Chief.
4. Fire Departments in each Fire District shall provide when possible, a response to all structure fires; motor vehicle accidents, dangerous goods incidents and wild-land fires within the County in accordance with this policy. Wild-land fires include those, which the County is obligated to provide an initial response to pursuant to any fire control agreement with the Province of Alberta. Anywhere within the Forest Protected Area Alberta Sustainable Resource Development must be notified.
5. A response as permitted above may only be initiated where the Fire Chief in charge determines, in his/her sole discretion, that it is safe to respond. The Fire Chief in charge may, at any time following the receipt of an alarm, request the assistance of any other department within the CFPES or with whom the County has entered into a mutual assistance agreement.
6. All dispatches shall be made according to the policy established herein and shall be tiered such that where a department is not available or where the Fire Chief determines a safe response by his/her department can not be made, the next closest Fire District can be notified and asked to respond.

**Structural Fire**

1. At a structural fire incident size up, the Incident Commander, in his/her sole discretion, may choose an offensive or defensive attack or to withdraw his/her resources as applicable.
2. It is the responsibility of the Fire Chief, or his/her designate, receiving the call to request appropriate backup from a neighboring district or mutual aid partner if deemed necessary.

**Vehicle Extrication/Motor Vehicle Accidents:**

1. Motor vehicle accidents requiring a Rescue unit which occur within Woodlands County should be responded to with a Pumper and Rescue unit from the closest Fire Department whether that station is in the Fire District within which the accident occurred or not.
2. Those Fire Districts that do not have a Rescue unit but which are closer shall respond with the Pumper truck and the closest Rescue unit from another District Fire Department shall be dispatched.
3. When responding to a motor vehicle accident outside the boundaries of Woodlands County, a Pumper shall accompany a Rescue unit and the responsible department shall be notified subject to any mutual aid agreements.

**Ambulance Assist Requests:**

1. District Fire Departments may receive requests and provide assistance to ambulance services in non-rescue medical situations from time to time.
2. Unnecessary duplication of services is to be minimized.

**Wild Land Fire Fighting:**

1. All Fire Departments may provide basic wild land fire fighting in accordance with any fire control agreement entered into by the County and the Province of Alberta.
2. Alberta Sustainable Resources Department is to be notified immediately when a wild land fire occurs.
3. CFPES will continue to fight a wildland fire if deemed safe to do so and until it is officially turned over to Land & Forest fire fighters.

**Flammable Liquid Fire Fighting:**

1. All departments provide flammable liquid fire fighting for small spill fires and small containers, at the discretion of Incident Commander, subject to the responding Department's capabilities.

**Dangerous Goods:**

1. All departments provide dangerous goods response at the awareness level and shall:
  - a. Use binoculars to determine contents or make up of the dangerous goods.
  - b. Contact CANUTEC at 613-996-6666 (call collect 24 hours) or \*666 (press star 666) for assistance in mitigating the incident.
2. If known and applicable, notify the transporter or the owner of the goods as soon as is practicable.

**Rescue:**

1. Fort Assiniboine Fire Department provides vehicle crash rescue at the technician level.
2. All other fire departments shall provide motor vehicle crash rescue at the awareness level.
3. All departments provide high angle rescue at the awareness-level.
4. All departments provide water rescue at the awareness level.
5. All departments provide ice rescue at the awareness level, subject to training specific to each department.
6. Fort Assiniboine Fire department shall provide swift water rescue at the technician level.

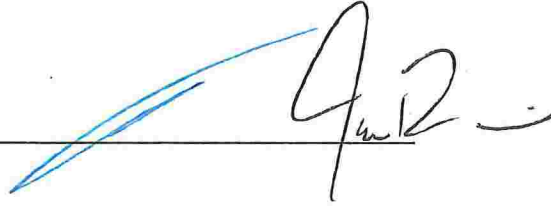

**First Responder Program**

1. Fort Assiniboine Fire Department shall follow medical control protocols according to their level of service as approved by medical direction.
2. Fort Assiniboine Fire Department members responding as first responders may be trained to a level of Primary Care Paramedic (EMT) level.

**Mutual Aid Agreements:**

1. Woodlands County Council encourages the CFPEs to recommend Mutual Aid Agreements with neighboring Municipalities and to the Director of Community Services.
