

Title: Gravel
Policy No: 3205

Approval: County Council
Effective Date: January 1, 1994

Revised: March 5, 2019

Policy Statement: To outline the gravelling requirements for the Municipality.

1. Regular Road Gravelling:
 - a) Up to 160 cubic meters (250 tonne) per kilometer on local roads of ¾" gravel.
 - b) Should more gravel be required per kilometer, the Area Supervisor or Director of Infrastructure Services is authorized to provide necessary amounts.
 - c) The full County gravel road system is to be regraded on a rotating 3-year program as required and as deemed by the Director Infrastructure Services.
2. Construction Gravelling:
 - a) Initial Lift of 10 cm of 1½" shall be compacted into the road base surface, followed by 5 cm of compacted ¾" crushed.
 - b) Approaches will be re-graveled during new construction or during the application of gravel to adjacent roads.
3. Residents requesting to purchase gravel from the County will be directed to purchase gravel from the private contractors in the area.
4. Requests by rural community halls, cemeteries and other institutions may be considered by Council.
- 5). Truckers, while working for the Municipality, are to travel at posted speed limits. Truckers are to use the roads courteously, considering such factors as privacy, noise levels and road conditions. A municipal employee may issue a warning to a non-complying operator. Repeat offenders may be suspended from further hauling.
